

Climobilize

The climate awareness and policy change group

OUR MISSION:

To align business decision-making, actions & profits, with environmental & social boundaries.

Climobilize unites **financial sector influence**, **legal expertise**, and **public action**, creating a powerful, interconnected push to expand corporate governance and director responsibilities beyond shareholder interests alone so businesses can achieve sustainable profits without undermining the long-term solvency of our planet.

Financial Sector Influence

Driven by the urgent need to manage climate-related financial risks and secure long-term economic stability, the financial sector convenes in the **Scorpion's Tail Club** to prepare the path for both policymakers and corporate leaders to realign governance with sustainable principles.

[Go To Page](#)

Legal Expertise

Through a **dedicated working group** in the Scorpion's Tail Club, legal experts focus on amending corporate law so director's responsibilities prioritize societal and environmental goals in addition to fiduciary duties, supporting the financial sector's objectives of long-term stability and climate risk mitigation.

[A Scorpion's Tail Club Group](#)

Public Action

Public action through **petitions and referendums** support the efforts of the financial and legal professionals, integrating into legislative processes to demonstrate widespread public support for decisive action by decision-makers to enable this critical shift.

Introducing the Scorpion's Tail Club

Mobilizing the financial sector to
de-risk the transition to "planetary
solvency" & sustainable profits

The Scorpion's Tail Club is a discreet forum for banking, insurance, pension, and investment leaders to address tail risks that drive increasingly frequent and severe climate-related events and social disruptions. Club members connect, collaborate, and draft policy recommendations advocating for corporate legislative changes that prevent business activities from breaching critical ecological and social thresholds.

Members Only

Curated

Discreet

OUR MISSION is to define the policies and legislation needed to change the conditions for economic growth away from "profits at all costs", towards "sustainable profits" achieved within global environmental limits to ensure "planetary solvency".

THE NEED: A growing number of influential leaders from the banking, insurance, pension, and investment sectors increasingly understand the consequences of climate-related tail risks for their industries and overall planetary solvency as described in the 2024 "[Climate Scorpion](#)" report.

But these same leaders need a "safe" place to collectively and frankly discuss and strategize about the policies and legislation needed to address these challenges, AND see those discussions and recommendations acted upon and implemented.

THE SOLUTION: The Scorpion's Tail Club - the Club - is a unique forum where, operating under Chatham House rules, senior financial leaders, sustainability leaders and climate scientists gather for discreet, candid discussions about extreme risks and threats to solvency. They evaluate system-changing options and alternatives at the "extreme" edge of mainstream discussions, and cooperatively prepare and support advancement of policy papers and legislation reflecting [3 Laws](#) that [can] remediate the worst consequences of climate change.

Club members benefit by contributing to de-risking the future of their industries, those they serve, and themselves, while also creating the foundation of a new economic ethos needed for a sustainable future. **All without risking personal or business credibility.**

Supported by
**Public Demand for
Change!**

Empowering Scorpion's Tail Club
members through public petitions
& citizen referendums

Citizens: the Heartbeat of Systemic Change

Climobilize unites the Scorpion's Tail Club's expert-driven policy recommendations with global public demand for climate action. As Club members develop policy and legislative recommendations, Climobilize amplifies the weight of their message by mobilizing the same public sentiment demanding change that's reflected in the [2024 Global Commons Survey](#).

Petitions

Referendums

OUR MISSION is to energize the efforts of the Scorpion's Tail Club members, and encourage decision-makers to align with the policy and legislative recommendations of the Club by demonstrating wide popular support that de-risks perceived political risk.

Grassroots actions like referendums and petitions are not only essential tools integrated into legislative processes for change in many jurisdictions - they are also powerful demonstrations of public will that drive lawmakers and corporate leaders to act.

That's why Climobilize leverages them to complement and reinforce the Scorpion's Tail Club's members' legislative and policy work to create additional momentum and accountability for change.

Harnessing citizen advocacy to support the Club's initiatives serves as a potent amplifier, giving impetus to Club members and decision-makers alike to push forward with legislative and corporate governance change that refines how businesses operate, aligning decision-making, actions & profits, with environmental & social boundaries.

Scorpion's Tail Club Membership Plans

**You have to be present to make your voice heard.
Be part of the inner circle with other select senior decision-makers.**

Choose from **Impactor** or **Observer** membership categories, in your corporate or personal/private capacity.

- Impactors actively engage in the discussions, activities and work groups to define the direction of policy.
- Observers are "in-the-know" about the latest developments but do not actively participate in the discussions.

Impactors

IMPACTORS are professionals from the insurance, banking, investment and pension fields, or from the sustainability and climate science fields, who want to actively participate in events & discussions leading to policy definition, and policy and legislative draft preparation.

Impactors can also purchase credits that enable them to vote on the order of priority of policies created in the working groups.

Observers

OBSERVERS are members from any industry, do not actively participate in discussions, but want to stay abreast of the latest thought-leadership, expertise and cutting-edge trends and policy directions being discussed in the Scorpion's Tail Club by gaining immediate access to all detailed meeting materials, documents, reports, etc. through the Club's members'-only portal.
